MID-FREQUENCY.

- LEBODY uses 1,000 Hz range which has least skin resistance and less pain & inconvenience among mid-frequency (1KHz~10KHz)
- Electrical current of Mid-Frequency is penetrated deeply into the muscle beneath skin.
- Mid-frequency stimulates muscles directly

Verified effect by clinical trial.

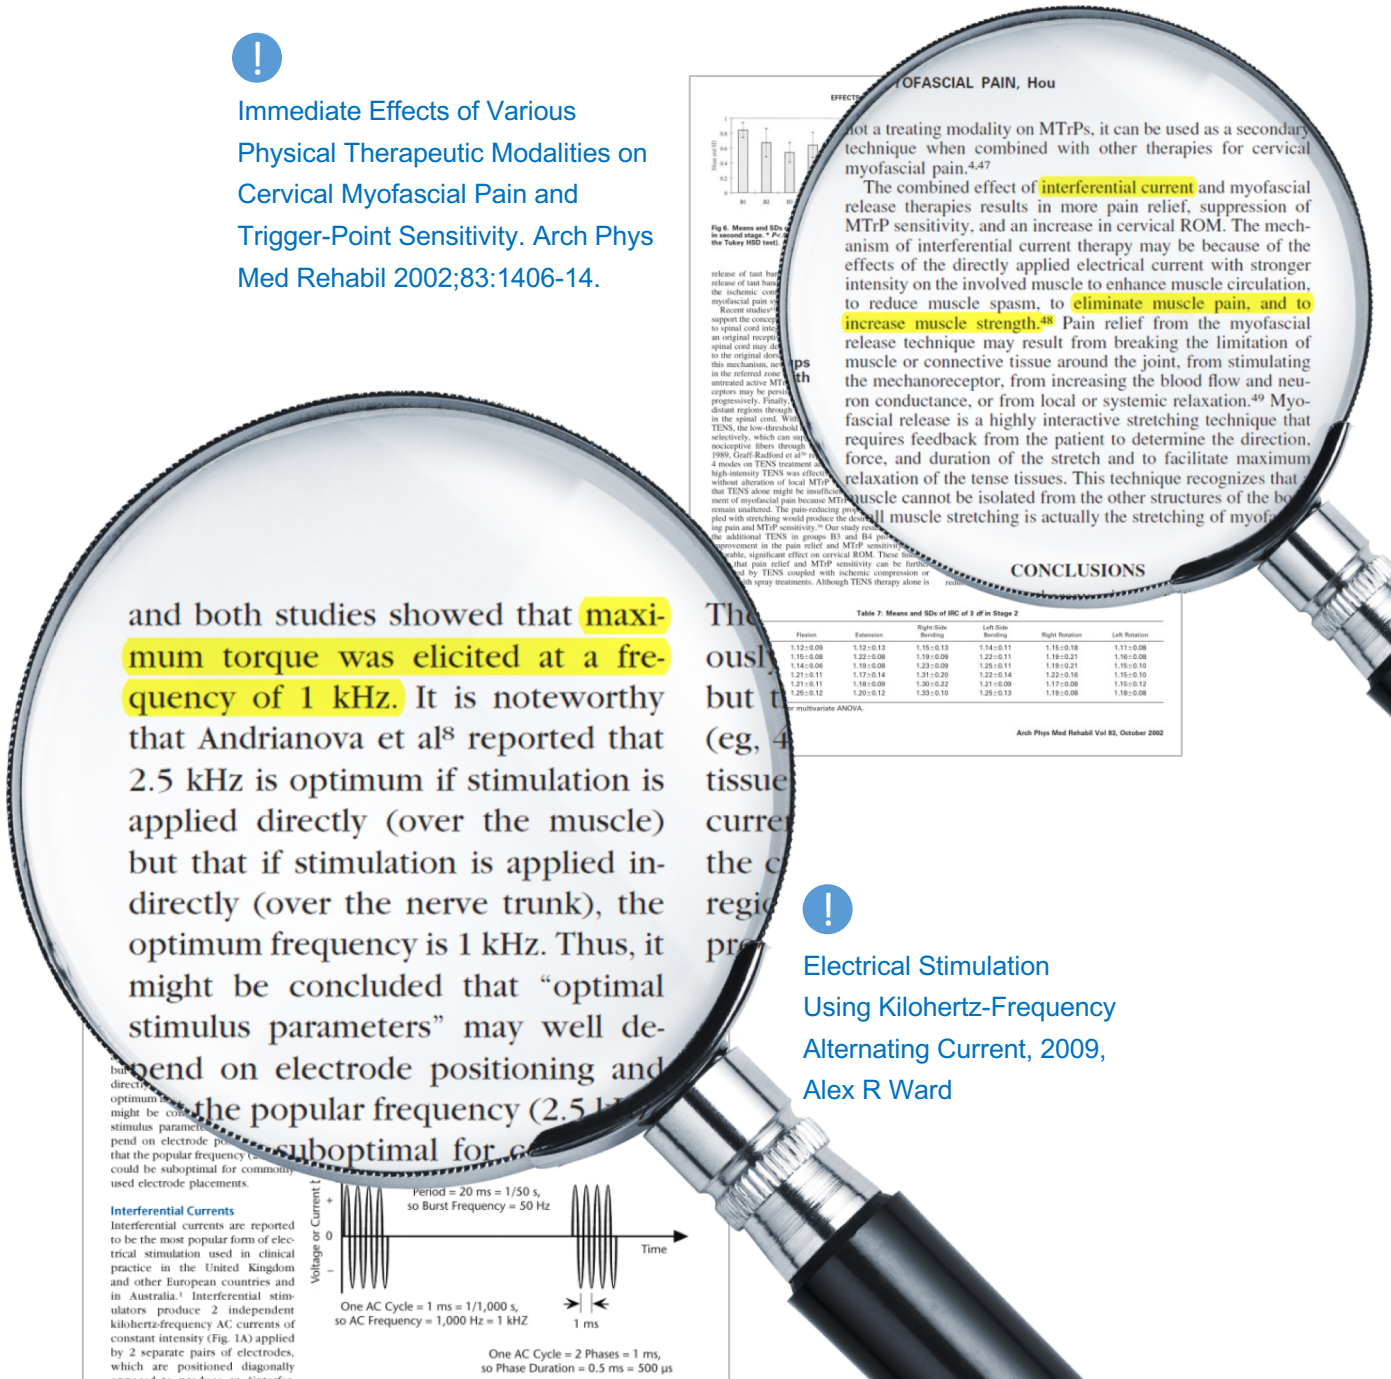

The frequency of 1,000Hz stimulates muscle's maximum **torque**, according to Thesis or SCI level.

- Torque : Torque is a force that causes something to spin around a central point such as an axle.

Moreover, the thesis shows that **beat frequency** makes strong stimulation and strengthens muscles.

* Beat Frequency (Interference) : In acoustics, a beat is an interference pattern between two sounds of slightly different frequencies, perceived as a periodic variation in volume whose rate is the difference of the two frequencies.

Immediate Effects of Various Physical Therapeutic Modalities on Cervical Myofascial Pain and Trigger-Point Sensitivity. Arch Phys Med Rehabil 2002;83:1406-14.

Electrical Stimulation Using Kilohertz-Frequency Alternating Current, 2009, Alex R Ward

Lebody is the final choice for nice body line

Mid-frequency of Lebody strengthens muscles and decreases body fat component by increasing cellular metabolism.
It improves body skin electricity and reduces swelling.
Lebody is for those who need to manage their body line regularly as supplementary workout and for those who want to lose weight more effectively.

Stimulate motor nerve → **Induce Energy consumption** → **Contraction and relaxation of muscles** → **Strengthen and generates muscles** → **Decrease Body Fat component**

Relieve muscle aches and stiffness

Mid-frequency of Lebody helps to improve the blood circulation by local vasodilation. It helps relieve muscle aches and stiffness by accelerating metabolism and eliminating body waste.

Massage muscle → **Improve blood circulation** → **Relieve muscle aches and stiffness** → **Pain control**
